Our customers are our reason for being...

...it is our mission to satisfy our customers by consistently supplying them with products that meet their requirements.
For over seven decades, MP Pumps, Inc. has designed and delivered quality pumps, meeting the exact needs of our customers. Our focus on providing new and innovative products for global use is paramount today. These include models for green initiatives, with reduced energy consumption, and with future generations in mind.

Gregory G. Peabody
President, MP Pumps, Inc.
Our History
MP Pumps, Inc. was founded in Detroit, Michigan in 1942, shortly after the United States entry into World War II. In fact, our pumps landed on the beaches of Normandy. They were used on transports and other amphibious vehicles on that historic day. To this day, we engineer and manufacture our pumps, keeping in mind just how critical quality and performance can be in every application, just as they were on D-Day.

After the war, our reputation for providing the highest quality centrifugal pumps allowed us to enjoy continued growth. We eventually outgrew our facility and moved to our current location in Fraser, Michigan. Our 100,000 square-foot facility houses our manufacturing, engineering, administrative and marketing staffs. In addition, we warehouse over 10,000 different parts to insure that our customers receive prompt delivery regardless of their needs or location.

Research and Development
A strong research and development program is fundamental to innovation. At MP Pumps, Inc., our innovative muscle derives from a highly trained and experienced research staff backed by a fully equipped laboratory for conducting rigorous performance and endurance testing.

Engineering
MP Pumps, Inc. brings more than a half century of experience in the design and manufacture of centrifugal pumps to each new project. Through experience, we can quickly identify and focus on the critical aspects of every design project and develop an approach to satisfy the most demanding performance requirements.

Our engineers use state-of-the-art solid modeling software, designed for manufacturing techniques and fast prototype capability, to move rapidly from initial concept to first production.
We have solutions for all of your fluid handling needs.

**Quality Control**
At MP Pumps, Inc., quality is designed into every component and every pump we build. From concept through development and on into production, our focus is to provide durable and reliable products that satisfy every customer requirement.

Our emphasis on quality is recognized by international standards agencies. Milestones include:
- **American Bureau of Shipping (ABS) Certification for select models**
- **ISO 9001-2008 Certification**
- **ISO 14001**

**Manufacturing**
Advanced technology is central to our manufacturing operations. Using state-of-the-art equipment and methods translates into speed, uniformity and consistent high quality.

But our people are what make the difference. Each operator is highly trained on their respective piece of equipment to ensure nothing but the highest quality for our customers.

**Customer Service**
As we look to what’s next for MP Pumps, Inc., we will continue to build on what we do best. When you buy from us, you will receive a high quality product that is strongly supported by all of our people. Because, we don’t go with the flow, we create it.
With a trained inside sales staff and more than 300 distributors around the world, an MP Pumps professional is always available to assist you with your application. MP Pumps reliability and durability is proven in some of the most severe operating environments every day. Contact us at mppumps.com to find your nearest representative or call 1-800-563-8006.
The "Pumps of choice" in a wide range of applications.
At MP Pumps, Inc., our goal is to make doing business with us easier than ever. To meet that goal, we have to really know our customers and their needs and be willing to constantly make changes and improvements to meet those needs. If you take a look at our website, you will have access to:

- Complete Catalogs
- Installation/Service Bulletins
- Pricing
- Contact information
- Technical Data
- Full Product Specifications
- Pump Applications
- Online Ordering
- Customer Survey
